

getTemperatureValue

```
graph RL; NewTemperature --> getTemperatureValue
```

A diagram showing a relationship between two variables. On the left is a gray rectangular box containing the text 'getTemperatureValue'. On the right is a white rectangular box containing the text 'NewTemperature'. A dark blue arrow points from the 'NewTemperature' box to the 'getTemperatureValue' box, indicating a flow or assignment from the variable on the right to the variable on the left.

NewTemperature
