

getTemperatureValue

```
graph RL; NewTemperature --> getTemperatureValue
```

A diagram illustrating a data flow or assignment. On the left is a gray rectangular box containing the text 'getTemperatureValue'. On the right is a white rectangular box containing the text 'NewTemperature'. A dark blue arrow points from the 'NewTemperature' box to the 'getTemperatureValue' box, indicating that the value of 'NewTemperature' is being passed to or stored in 'getTemperatureValue'.

NewTemperature
